COVER  POOLS®

# Multiple Benefits, One Incredible Cover

## Why Cover-Pools?

Including a Cover-Pools® automatic pool cover on your next project means more enjoyment, safety, and energy efficiency for your customer.

To ensure our dealers' success, we provide the highest level of customer service—supporting you before, during, and after the sale.

COVER  POOLS®

# How Cover-Pools Will Benefit Your Customers

Our multitasking cover acts as a safety cover, solar cover, and winter cover, all combined in one efficient system.

## Any Pool, Any Shape

An automatic pool cover from Cover-Pools can be made to fit any pool shape, provided there is room for the tracks to run parallel to one another on a level surface. Every pool makes its own unique statement, and our Cover-Pools pool covers are designed to tastefully complement the style of each pool.

## Safety

As a safety device, our pool cover acts as a horizontal fence, completely sealing off and preventing unintended access by children, pets, and uninvited visitors. It's the ultimate safety barrier that no pool should be without.

## Cost Savings

By saving heat, chemicals, cleaning time and extending equipment life, a Cover-Pools automatic pool cover quickly pays for itself. You can save up to 70% on operating costs—a great return on your investment.

## Water Conservation

An uncovered 16' x 36' pool can lose as much as 180 gallons of water a week to evaporation, taking expensive chemicals with it. Our pool covers help conserve hundreds of millions of gallons of pool water each year, preserving the planet's most precious resource while saving you money.

## Convenience

When the pool is not in use, the pool can be covered to keep it safe and clean. The cover keeps dirt and debris out of the pool, reducing cleaning and maintenance costs and wear on pool filtration systems.

# Options for a Custom-Fit System

Cover-Pools offers a wealth of options for customizing your pool environment.

## Automation

With our automation system, the pool cover glides across the pool or spa in under 60 seconds. Water features, lights, and other accessories can also be included in our popular automation.

## Housing the Mechanism

Our recessed mechanism can be housed in an enclosure below the deck surface for a seamless look. We also offer lid options for covering a recessed mechanism, such as the extended lid option, which allows the leading edge of the retracted cover to be hidden.

## Mechanism and Motors

BigRed®, our standard electric drive system, is the toughest waterproof motor on the market. For those who have limited space, we also offer a powerful 1.5 horsepower hydraulic motor.

## Track Systems

Any pool—whether concrete, vinyl or fiberglass, rectangular or freeform, new or existing—can be covered. Our Underside™ Track offers a stylish way to integrate a Cover-Pools pool cover system with your new pool and deck.

## Fabric

Cover-Pools exclusive QuadCore™ fabric provides maximum durability in the swimming pool environment. We offer 11 standard fabric colors for your pool cover.

## Square Leading Edge

The square shape option makes it easier to hide the leading edge and creates a better seal at the far end pool wall. To create a more integrated look, the leading edge can be wrapped in fabric identical to the cover.

## Stainless Steel Cable

We optimized and simplified our current design with our pool builders in mind. Using stainless steel cable means fewer pool cover adjustments and easier fabric replacements.
